# G33: Google Form Survey Report

**Google Form Link:**

https://forms.gle/4GHz39y6vTYrU7wv8

**Response sheet:**

https://docs.google.com/spreadsheets/d/1yDsvP3gWaP2ppyaSmZu1_MNvNDTptNSrsSNHwHIZluw/edit?resourcekey=&gid=1128725504#gid=1128725504

## Ques 1:

How frequently do you use online learning platforms?

## Outcome:

**Most learners use online learning platforms almost daily, highlighting their central role in education. This shows high adoption and reliance, so user engagement is not an issue.**

## Ques 2:

Which online classroom/learning platforms have you used before?

## Outcome:

**Learners have prior experience with multiple platforms, meaning they can compare and identify gaps. This helps in understanding expectations and benchmarking features.**

## Ques 3:

On a scale of 1–5, how satisfied are you with existing platforms?

# Outcome:

**Satisfaction levels vary, showing room for improvement in existing solutions. Feedback here guides enhancements in usability and learner experience.**

**Ques 4:**

What problems have you faced while using existing platforms?
A: Some of the most meaningful responses:

| |
|---|
| google classroom has many glitches |
| Not proper notification customisation avaliable. |
| Other groups submission showing in my group |
| Interaction |
| As such no major issue |
| One of the main problems I've faced while using platforms like Google Classroom is the user interface. It doesn't feel very intuitive or engaging. Sometimes it's hard to find older assignments or resources because everything is just listed in a stream, and important things get buried quickly. |
| No notification or late notification when new contant is uploaded |
| The platform and made and handed over, but time to time updation on various outdated features, course |

Inconsistent tracking of pending work between different subjects. Not enough info about students progress

Sometimes it's take more time to load

teachers do not know how to efficiently use the software available, leading to trouble for students

on moodle sometimes the submission screen gets stuck.

No issues

Lots of technical problems, leading to some moments where class gets disturbed or interrupted.

no quiz reminders

Not having personal coversation prof personaly

It is ver difficult to ask any doubt or query in Google Classroom or moodle.

Lack of personalization and inaccuracy of notifications

No problem

Server crash

Latency

there should be a feature(hack) in which if i submit assignment after the deadline then shouldn't appear to faculty.

It takes to much load while upload and download.

1. Collaborative Submissions
2. No Deadline Extension / Update remainders
3. Can't track progress

## Outcome:

**Users report meaningful issues such as technical glitches, lack of engagement, and limited interaction. These insights point to core problem areas that need fixing.**

Ques 5:

Which features do you consider most important in a virtual classroom?

Which features do you consider most important in a virtual classroom?

Copy chart

102 responses

| Feature | Responses |
| --- | --- |
| Uploading and sharing study materials | 76 (74.5%) |
| Managing assignments and deadlines | 66 (64.7%) |
| Group discussions and collaboration | 41 (40.2%) |
| Real-time chat/doubt resolution | 45 (44.1%) |
| Tracking student progress | 46 (45.1%) |

# Outcome:

**Key features valued by users include smooth interaction, collaboration tools, accessibility, and reliability. This establishes the baseline must-have features for any virtual classroom.**

Ques 6:
If you could **add one unique feature** to your ideal virtual classroom, what would it be?
A: The best responses shown below:

If you could **add one unique feature** to your ideal virtual classroom, what would it be?

102 responses

notification customisation according to user requirements like how much hour before you want notification what are the pending submission according to priority etc

Where we can send group wise assignments and also study materials to whole class

Unknown feedback to mentor

Recorded video of all the live sessions that are covered

you are the developer you add it

Query tool where everyone can ask their questions and every student get to answer it..

Adding footnotes and comments on your notes and materials for your own reference

Real time chat

Okay

**If you could add one unique feature to your ideal virtual classroom, what would it be?**

102 responses

Chat system

Progress tracking for self

Discussion and doubt solving section

In built AI agent which helps in managing assignment deadlines and left topics

Flashcard mode

Adding Ai to submit the assignment which are pending

Feature that provides mental health support during stress

Collaborative study

i need a hack same that i have mentioned in q4.

---

Add live lecture portion (online lectures)

We can add such system when Teacher can talk with student when they want via classroom or any other platform.

Feature for requesting extension for submission.

That we can arrange are scheduled of week workon monday

It should provide all relevant materials across all platforms

It only has general chat box, I think personal chat box will be useful.

Every online learning platform should provide free textbooks and reference books with any course purchase.

tracking student progress and editing or doing assignments on the same platform

Doubt solver

**<u>Outcome:</u>**

**Unique feature requests highlight creativity and evolving learner needs .**
**And we will try our best to fulfill each of them...** 🙂

# Thank you
